PROJECTS

[Portfolio](#) *Fully Reactive* (React.JS, Hostinger, Vercel)

- Portfolio site built to showcase myself and my projects
- Built using **React.JS**, **React Redux**, **React Router**, **HTML**, and **CSS** and hosted on **Hostinger** and **Vercel**
- Two extra pages for thank you message, and resume managed by **React Router** and contact form managed by **formssubmit.io**

[Instagram Clone](#) *Fully Reactive* (React.JS, TailwindCSS, Hostinger, Vercel)

- Built clone of the popular social media app Instagram using **React.JS**, **Next.JS**, **Tailwind CSS**, and **Recoil** for the front end
- Used Google's **NextAuth** to allow sign in via Gmail and connected the front end to **Firebase v9**, where all posts, likes, and comments are stored, while hosting on **Hostinger** and **Vercel**
- Connected to **Faker.io** API to extract fake posts, accounts, and comments to mimic Instagram social media posts

[Netflix Clone](#) *Fully Reactive* (React.JS, Firebase v9, Firestore, Stripe)

- Built clone of the Netflix website using **React.JS**, **HTML**, **CSS**, and **Redux** for the front end
- Connected to **TMDB** ("The Movie Data Base") API to extract movie posters, titles, and descriptions to mimic Netflix home page
- Used Google's **NextAuth** to allow new users to create accounts via email/password and sign in/out with existing accounts
- Deployed on **Firebase v9** using firebase deploy, while also storing all account data on the **Firestore** database
- Connected to **Stripe** with Firebase to allow credit card processing

[Personal Blog](#) (Python, Django, AWS, Elastic Beanstalk/EC2)

- Created personal blog to track my progress and interest during my learning journey, using the **Django/Python** framework
- Hosted on **AWS**, utilizing the **Elastic Beanstalk/EC2** services for the back-end storage of blog posts, pictures, and comments.

WORK EXPERIENCE

Alexander Budrevics & Associates Ltd.

Toronto, Canada

Landscape Designer

April 2021 - Present

- Coordinated and managed **~20 projects/year** up to **\$1M in revenue** with team of **30+ industry consultants**, focused on designing commercial and industrial landscape sites while monitoring and tracking progress of end-to-end development projects
- Defined the project's vision and objectives as well as co-create the art of the possible and draft the initial designs given the project's guardrails, inclusive of budget, city by-laws, and sustainability metrics, with the client and the Sr Landscape Designer
- Prepared detailed cost estimate sheets outlining itemized list of materials and costs to complete project for client approval
- **Conducted quality assurance (QA)** checks through development to ensure final build matches design standards; wrote Change Orders (COs) for partnering contractors to reconcile and rebuild components that did not pass QA
- Assisted in **training 3 intern Landscape Technicians** to ensure company standards/practices are met when preparing packages

Region of Peel

Brampton, Canada

Landscape Design Intern

April 2019 – August 2019

- Planned, organized, and delivered **300 40-min advisory sessions** with private residence owners across the Greater Toronto Area
- Co-facilitated discovery sessions to assess clients' existing water usage systems and co-create the ideal architectural design to optimize water efficiency resulting in cost savings for both the client and the Region of Peel due to more efficient water usage
- Recorded and continuously updated **Client Relationship Management (CRM)** tool to provide real-time information and insights to the business, allowing for appropriate communications and follow-ups

EDUCATION

University of Guelph

Guelph, Canada

Bachelor of Landscape Architecture (Cumulative GPA: 82%)

September 2017 - April 2021

Scholarships & Awards: Deans Honours List, Guelph Entrance Scholarships
